HOW TO USE DEVICE

Please make sure to read these instructions in the manual carefully before using the device for safety and proper use.

Do NOT touch or insert any items into the optical unit/lens.
Putting foreign substances inside the optical unit or touching the inner part of the lens can affect image quality causing the images to become blurred or unclear. In case there is dust on the lens, use the provided air blower to remove it. Also, do NOT put fingers or hands or other substances into the optical unit/lens. Potential damage can occur to the handset if attempted.

Do NOT look directly into the light of the optical unit.
The optical unit has multiple LEDs which can emit high brightness. Do not look into the light directly to prevent damaging the eyesight.

Do NOT let conductive materials/substances come into contact with the charger socket or the sensor of the handset.
Do NOT let conductive material (scrap medal, lead etc.) come into contact or get inside of the sensor or the charger socket of the handset. If something seems wrong, stop using the and set and inquire at the retailer or customer support center.

Use the device at temperatures between 5c° ~ 40c°.
Proper storage is required for the device. Potential damage can occur on the handset such as errors or abnormal battery discharge in case the handset is used or stored in too hot or too cold places.

HOW TO LOGIN

LOGIN STEPS

1. As an administrator, click on Sign Up to create an account and log in to the app.

2. Register the device after logging in.

3. Enter the Device Optic Number and SSID Number once registered.

4. After completing these steps, proceed with the analysis.

# ACCOUNT SET-UP

- **START SCREEN**

QUESTIONNAIRES

1. The Questionnaires will pop up. You may answer them or skip the questionnaires.

2. After answering or skipping the questionnaire, you will be on **"Results"** page.

RESULTS

Results Include:

- **Scalp** Condition: This section provides an overview of your scalp's current health and any hair damage. It helps you identify areas that may require attention.

- **Weakness Box:** Here, you'll find the top two scalp issues identified during the analysis. These are key areas to focus on for maintaining a healthy scalp.

- **Spider Graph:** The Spider Graph visually represents your scalp's condition across different concerns. The closer your results are to the center, the healthier your scalp is in those areas.
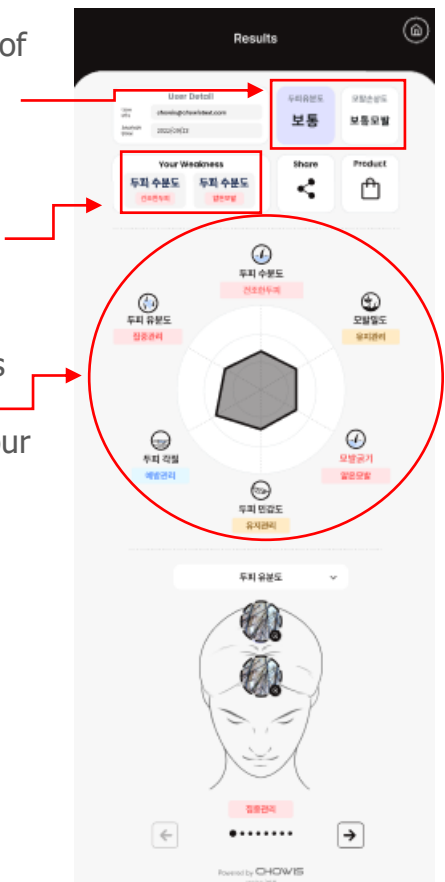

- View Images: Click on the parameter to see your captured images.
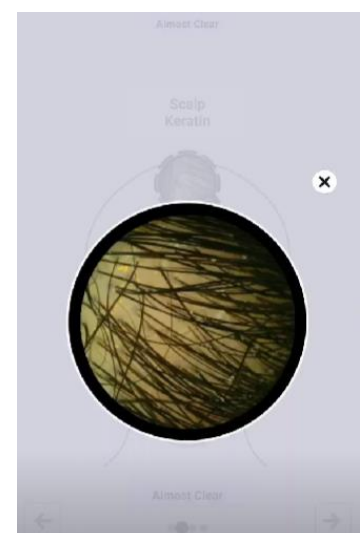

SETTINGS

1. Under the Settings page, click on Device Setup to check if the device is registered.

2. Click on User Profile to review and edit your details.

3. Log out by clicking on Log Out from the app.
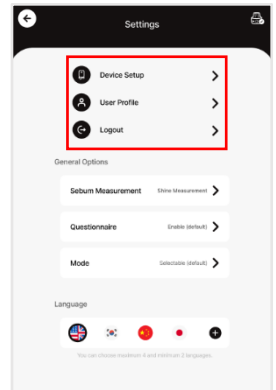

4. The questionnaires are enabled by default. If you want to disable them, click on the dropdown and select Disable.
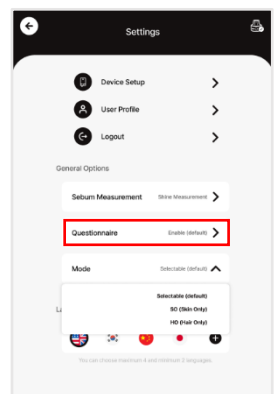

5. You can select the analysis mode. By default, both skin and hair analysis are enabled, but you can choose to perform only one (skin or hair) from the dropdown menu.
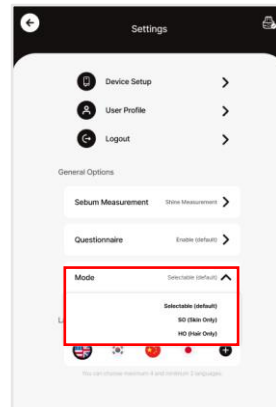

6. Click on the Language icon to select your preferred language from the list.

FAQ

DIAGNOSIS SYSTEM IN USE

USER AND CUSTOMER REGISTRATION

Chowis' diagnostic system will first ask if you are a new user or have an existing account. If you are new, select 'No.' Fill in your email or phone number, or you can skip this part. Next, select your birth year and gender to complete the registration.
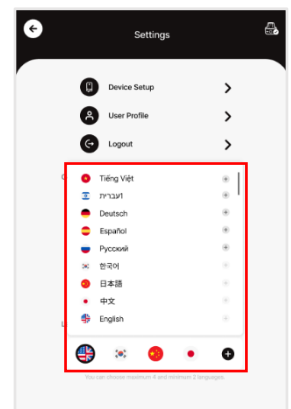

THE DEVICE FEELS HOT.

As the optical unit/lens part emits a lot of LED light and long periods of continuous use can cause the device to heat up. If the heat is severe, immediately turn the device off and stop using it until it has cooled down. If the device is still hot even after a certain period of time has passed, please inquire at a customer support center. Also, a reason for over-heating could be when the device is left with power switched on during charging. Always remember to turn the handset power off before charging.

APPENDIX

APPENDIX: PROPER IMAGE CAPTURING

1. For Skin Analysis, focus the camera on the skin for accurate analysis.
2. For Skin Analysis, focus the camera on the skin for accurate analysis. Ensure no hair strands covering up the scalp area.
3. Keep holding the device on your scalp until both images are taken, then you'll see a "Capture Complete" message.

EXAMPLE

Focus the camera on the skin for accurate analysis.

EXAMPLE

Focus the camera on the scalp for accurate analysis.
